

APPRENTICESHIP IN SOFTWARE DEVELOPMENT

KC PIVOT Great Opportunities, Great Outcomes

KC Pivot (KCP) is a leading Systems Company that conducts and manages **enterprise software projects** whilst developing **young software professionals** via powerful internship programs.

Accelerate your career in our 12 month **Software Development Apprenticeship Program** by gaining vital commercial experience and learning lifelong software principles that will put you ahead of your peers.

90 Day Bootcamp Experience.

Learn and practice TDD, Unit Testing, SOLID principles, and practical software engineering patterns and practices with hands-on coaching from experienced software engineers during an intense 3 month Bootcamp. Develop solid technical skills using KATA intentional learning principles and expert instruction and feedback.

Enterprise Team Experience.

Join an enterprise software team, receive coaching and encouragement from experienced team members to achieve your skills goals. Work on complex production software, learning first hand how software is built in an agile high-performance team. Contribute to the code, quality and user experience of the product you work on.

Full Stack Application Experience.

Build your own personal layered web software application with modern technologies, receiving direction and coaching from experienced software professionals. They conduct every step of the SDLC and develop every layer in a modern software stack, developing your skills and proving your abilities.

THE PROCESS

Bootcamp Experience (3 months)

Project Experience (9 months)

WHY CHOOSE THE KCP APPRENTICESHIP?

- Competitive salary
- You receive industry training in practical coding, testing and professional disciplines
- You receive a personal skills plan and you are given feedback throughout the program
- You are coached directly via hands-on exercises by professional industry developers and testers
- You build real skills developing your own end to end full stack application, getting input throughout
- If you make the grade you are assigned to conduct meaningful work on a real production team with experienced developers.
